

White Paper (Phase 1)

This is our White Paper. It will lay out some of our plans for Phase 1 and 2 to get the Project started off and somewhat give a Time line of events of things to come or future plans. Future plans can easily change, and we may choose a different or better direction especially in an ever changing and growing Blockchain environment.. We will update of any changes immediately and do revisions to the Whitepaper.

What is RisknRewards?

We are a Membership NFT Project started on the WAX Blockchain with a main focus on the financial and investment sides of the Blockchain. We wanted to start a Project with Low Risk but High Rewards. With all the hacks, rug pulls and scams these days it can be so hard to keep your Portfolio growing without risking it all and that is where we step in with a new kind of Project with a new breed of NFTs..

Through our website and Collectible NFTs we are looking to bring access to parts of the Crypto and the Blockchain that usually involve a high degree of Risk to get into. (Gaming, Liquidity Pools, DEX's, Mining, Nodes, Blockchain Producer, Defi, Staking and others) and what we will do is integrate what we can into the Project while also bring the benefits of what we have accumulated off-chain and adding them to our website or bring them back over to the WAX Blockchain and benefit our Members with free NFTs, staking rewards(WAX DAO), discounts, many more benefits to come as we grow.

RISK N REWARDS

1. WAX Founders NFT (Phase 1)

Our Elite Membership NFT and most rewarding will be the WAX Founders NFT. There will only be 333 WAX Founders NFTs ever minted.

In Phase 1 we will keep it simple but still beneficial and rewarding for our Founders as sales close and we begin to slowly scale up and integrate upgrades and services into the website. Founders NFTs will be stakable in the only Pool we create on the WAX DAO we will fill with USDT.

We are part of and creating side Projects off-chain away from the WAX Blockchain that will benefit our Founders Members, and one of them involves getting Liquidity/DEX Mining Pools. These are highly stabilized mining pools using AI that offer safe yet high returns compared to traditional LPs but to gain access to the full benefits of these pools costs tens of thousands of dollars to \$100,000 to get into.

We take all that risk off the table for our members with a one-time only low-cost Membership. All our **Founders** must do is stake your NFT(s) to the farm and claim them.

Recycling of Funds

Every 6 months we will Recycle our funds back in the LP/DEX Mining Pools with no further Risk to our Founders. 6 Months or 180 is the Locking Period for the funds in these Mining Pools. This makes it possible to refill the staking pools/farms every 6 months and make each farm equal to or larger than the previous one.

RISK&REWARDS

2. Upgrades/Staking/Profiles(Phase 1)

Shortly following the close of the sale of our WAX Founders NFT we will fund the LP/DEX Mining Pools and within 3 weeks to 1 Month we will create and fund the WAX DAO V2.

We will start expanding the team, looking into partnerships and collaborations as well as looking into website upgrades (NFT log ins, Members Only Areas, Members only Faucets), possibly creating our own version of Staking and/or try working with the WAX DAO (if possible), creating Profiles for our users and members as well looking into additional Smart Contracts we can integrate into the website/Project.

We will keep building on-chain and off-chain at a steady rate and keep you informed every step along the way. Every project or program we find beneficial to our Members and the Community we will announce what it is and how it is beneficial to our members and/or community.

We will be adding our "Get Paid to Live" section soon where we will list some of the best most beneficial projects and websites our members and the community can use right away. Whether it is some extra passive income, extra savings, or just makes life easier, we will be researching and listing these beneficial sites for all to see.

We also want to keep costs down and use all funds as efficiently as possible and not have all of our eggs in one basket as people say. We will make sure to diversify because you never know when on project/program may end and another begin.

We will place funds where needed to keep scaling up the Project while trying to add additional services all while keep transaction and transfer costs down.

The logo for Risk & Rewards is displayed in a black rectangular box. The word "RISK" is in red, the ampersand "&" is in orange, and the word "REWARDS" is in green. All letters are in a bold, sans-serif font.

RISK&REWARDS

3 Collectibles and Services (End Phase 1)

The Collectibles we create will all provide some form of Utility. Whether it is being stakable to a rewards pool/farm we have created and/or access to part(s) of the website all of our NFTs will have a use unless specified otherwise.

The next set of the Collectibles we are offering will be stakeable for WAXP and EOS in the NFT Farm/Pool on WAX DAO. These will be some amazing AI Art pieces with different rarities, a great theme and stimulating to the eyes is all we can tell you know for now. These will be more available to the rest of the community and the Founders will be whitelisted for an amazing discount and a Membership only sale with and NFT/Pack drops.

We are plan to integrate a Membership only crypto faucet as well as give exclusive opportunities to join us on some of our ventures or even become a partner so you can start building your own empire. We want our Founders to succeed in all aspects of their life and we want to help you do it.

In **Phase 2** we should have the website upgraded and fully integrated, the Team growing and NFT token gated content accessible. We will now start to grow our Services portion of the Project.

We will always look for ways to grow and evolve as cryptocurrencies, NFTs, The Blockchain and The Metaverse do. We will keep you updated on all things we do every step of the way. We look forward to a long and prosperous Project and hopefully all of our lives will have changed for the better. As Cryptocurrencies are further adopted across the world the growth should be tremendous and we will be there along for the ride!

We want to Thank our Founders, the community, and our future partners/collaborators for making this Project possible!
